

Celmak 1300 Single Chop Forage Harvester

Finance
Available

These Single Chop Forage Harvesters are excellent machines for harvesting grass, lucerne and beet tops.

They are also suitable for making silage. The material that is harvested is blown directly onto the trailer.

- High output with low power consumption
- Simple operation and maintenance
- Outstanding performance
- Longer durability
- Better fodder quality, with lower losses
- By only removing the wrapping, wrapped bales can be chopped with ease.
